**Citizen Activities in Energy Transition** Sampsa Hyysalo,2021-06-09 This book addresses the rapidly changing citizen roles in innovation, technology adoption, intermediation, market creation, and legitimacy building for low-carbon solutions. It links research in innovation studies, sustainability transitions, and science and technology studies, and builds a new approach for the study of user contributions to innovation and sociotechnical change. Citizen Activities in Energy Transition gives detailed and empirically grounded overall appraisal of citizens' active technological engagement in the current energy transition, in an era when Internet connectivity has given rise to important new forms of citizen communities and interactions. It elaborates a new way to study users in sociotechnical change through long-term ethnographic and historical research and reports its deployment in a major, decade-long line of investigation on user activities in small-scale renewables, addressing user contributions from the early years to the late proliferation stages of small-scale renewable energy technologies (S-RETs). It offers a much-needed empirical and theoretical understanding of the dynamics of the activities in which users are engaged over the course of sociotechnical change, including innovation, adoption, adjustment, intermediation, community building, digital communities, market creation, and legitimacy creation. This work is a must-read for those seeking to understand the role of users in innovation, energy systems change and the significance of new digital communities in present and future sociotechnical change. Academics, policymakers, and managers are given a new resource to understand the demand side of sociotechnical change beyond the patterns of investment, adoption, and social acceptance that have traditionally occupied their attention.

*Sociological Theory in the Classical Era* Laura Desfor Edles, Scott Appelrouth, 2009-10-09 This book is a hybrid of text and readings, providing both original, major writings of sociology's key classical theorists and a theoretical and historical framework, written by Edles/Appelrouth, with which to better understand the readings. This is a major difference from the traditional reader which can leave students unmotivated when readings are thrown at them one after another with no interpretive guidance or analytical framework. Features/Benefits: - Text plus readings in a hybrid form. The text will provide the interpretive and analytical guidance necessary to interpret the readings. It includes a 30 page introduction (Ch.1) , 8 - 14 page introductions in each chapter, 1 - 2 page article introductions, and a 10 -15 page conclusion at the end of the book. - 'Theoretical Orientation Diagrams' and 'Core Concepts Diagrams' provide students a means to fit the theorist under study into the broader universe of social theory. - 'Significant Others' boxes provide information and biographies on theorists who may have followed and derived much of their own perspective from the major theorists featured in each chapter. - Discussion questions at the ends of chapters. New to this Edition: - At least 7 new 'Significant Others' boxes. - Each chapter updated with new examples. - New readings added to Weber, Marx, and Durkheim chapters. - New chronological order for readings where possible (where not possible - i.e. it does not fit the logical thematic to do so there will be an explanation in the introduction as to why the readings are ordered the way they are).
