Biogeography of Freshwater Algae Jørgen Kristiansen, 1996-12-31 This book is based on a workshop on biogeography of freshwater algae held during the Fifth International Phycological Congress in China 1994. A group of outstanding specialists covering widely different approaches to the subject have been brought together, and this collection of their contributions forms a unique volume: there is no other book on the subject. It thus fills an evident gap in the phycological literature, and will be of major interest to researchers and teachers within phycology, limnology, and evolutionary biology. However, it may also be useful in courses for advanced students.

Antioxidant Status, Diet, Nutrition, and Health Andreas M. Papas, 1998-09-17 This is the first book to integrate the biological, nutritional, and health aspects of antioxidant status. Fifty contributors integrate and transfer the knowledge of free radicals and antioxidants from the test tube to the laboratory of the biologist, clinical nutritionist, and medical researcher, as well as to the office of the dietician, nutritionist, and physician. Topics examined include factors affecting and methods for evaluating antioxidant status in humans; effect of diet and physiological stage (infancy, aging, exercise, alcoholism, HIV infection, etc.) on antioxidant status; and the role of antioxidant status in nutrition, health, and disease.

Toxicity Reduction Davis Ford, 1998-05-18 In the reauthorization of the Clean Water Act in 1987, the U.S. EPA specifically addressed toxics management. In addition to the requirement to eliminate discharge of toxics, there can be a requirement to conduct a toxicity reduction evaluation (TRE). The scope of toxicity reduction varies from the very simple and inexpensive to the highly complex and costly. This book, volume three of the Water Quality Management Library, provides a complete overview of toxicity reduction evaluation. The book presents the testing and removal of toxicants, toxicity testing procedures, sampling techniques, baseline collection data, and source identification. Plus, the book presents toxicity reduction methodologies including unit processes necessary for organic toxicant control using biological and physical chemical

methodologies as well as selected unit processes necessary for inorganic toxicant control.

Dark Star Rising Gary Lachman, 2018-05-29 Within the concentric circles of Trump's regime lies an unseen culture of occultists, power-seekers, and mind-magicians whose influence is on the rise. In this unparalleled account, historian Gary Lachman examines the influence of occult and esoteric philosophy on the unexpected rise of the alt-right. Did positive thinking and mental science help put Donald Trump in the White House? And are there any other hidden powers of the mind and thought at work in today's world politics? In *Dark Star Rising: Magick and Power in the Age of Trump*, historian and cultural critic Gary Lachman takes a close look at the various magical and esoteric ideas that are impacting political events across the globe. From New Thought and Chaos Magick to the far-right esotericism of Julius Evola and the Traditionalists, Lachman follows a trail of mystic clues that involve, among others, Norman Vincent Peale, domineering gurus and demagogues, Ayn Rand, Pepe the Frog, Rene Schwaller de Lubicz, synarchy, the Alt-Right, meme magic, and Vladimir Putin and his postmodern Rasputin. Come take a drop down the rabbit hole of occult politics in the twenty-first century and find out the post-truths and alternative facts surrounding the 45th President of the United States with one of the leading writers on esotericism and its influence on modern culture.

Yvain Chrétien de Troyes, 1187-09-10 The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

Probit Analysis David Finney, 2009-07-16 Originally published in 1947, this classic study by D. J. Finney was the first to examine and explain a branch of statistical method widely used in connection with the biological assay of insecticides, fungicides, drugs, vitamins, etc. It standardized the computations and terminology and made its use easier for a biologist without statistical expertise, whilst also outlining the underlying mathematical theory. Finney had made several important contributions to the method in the past, and his own results are also included. The book contains a foreword by the influential insecticidal chemist Dr F. Tattersfield.

Seafoods: Chemistry, Processing Technology and Quality Fereidoon Shahidi, J.R. Botta, 2012-12-06 Seafoods are important sources of nutrients for humans. Proteins and non protein nitrogenous compounds play an important role in the nutritional value and sensory quality of seafoods. Consumption of fish and marine oils is also actively encouraged for the prevention and treatment of cardio vascular diseases and rheumatoid arthritis. Highly unsaturated long-chain omega-3 fatty acids are regarded as the active components of marine oils and seafood lipids. The basic chemical and biochemical properties of seafood proteins and lipids, in addition to flavour-active components, their microbiological safety and freshness quality, are important factors to be considered. A presentation of the state-of-the-art research results on seafoods with respect to their

chemistry, processing technology and quality in one volume was made possible by cooperative efforts of an international group of experts. Following a brief overview, the book is divided into three sections. In Part 1 (chapters 2 to 8) the chemistry of seafood components such as proteins, lipids, flavorants (together with their properties and nutritional significance) is discussed. Part 2 (chapters 9 to 13) describes the quality of seafoods with respect to their freshness, preservation, micro biological safety and sensory attributes. The final section of the book (chapters 14 to 16) summarizes further processing of raw material, underutilized species and processing discards for production of value added products.

Flavor Chemistry Roy Teranishi, Ron G. Buttery, Fereidoon Shahidi, 1989 Details the contributions of different aroma compounds to the overall flavor characteristics of different foods. Describes experimental methodology, correlation of sensory properties with chemical structure, and mechanisms of formation of characteristic flavors. Eighteen chapters explore the mechanisms by which enzymes and heat cause the formation of flavor compounds; instrumentation, sensory and structure-flavor activity; recommendations for the harvesting and storage of fruits, vegetables, meats, etc.; and the needs of R&D and academic research.

Decanter Centrifuge Handbook A. Records, K Sutherland, 2001-03-02 Scope of Publication A reference work for process designers and users of decanters, this book aims to bridge the information gap in this field - that between academic theory promoted in student textbooks and case study data in manufacturers sales literature. Design It includes information on design and specification, preparing the reader to select and correctly size equipment. Purchase As a design or project engineer working with vendors to make final equipment selection, this work provides the readers with the full facts before they start talking to product vendors. Supply In an environment of industry consolidation, the handbook allows you to track suppliers old and new, providing a basis on which users can find the new relevant company for the parts/service he/she wishes to purchase. Operation Once an equipment purchase is made, the user needs to be made aware of how to optimally operate decanters.
