Aging and the Life Course Deborah Lowry, 2022-01-10 *Aging & the Life Course: Social & Cultural Contexts* provides an accessible, up-to-date introduction to the study of aging and the life course from a distinctly sociological perspective. It explores the sociocultural dimensions of aging while encouraging critical thinking about the diversity of aging experiences, societal attitudes toward older adults, the politics and economics of growing old, and end-of-life resources. Throughout the text, Deborah Lowry emphasizes the relevance of the material for working with older populations, understanding social policy and policy debates, improving communities, relating to others, and understanding ourselves. Organized into four major sections, Part I introduces students to fundamental demographic, sociological, and life course concepts; part II explores the experiences and conditions of aging, especially in particular groups; and part III presents current research on older adults' engagement in work, family, social networks, and sex. Finally, Part IV addresses themes of aging and social change.

Aging Harry R. Moody, Jennifer R. Sasser, 2017-01-12 Presenting current research in an innovative text-reader format, *Aging: Concepts and Controversies*, Ninth Edition encourages students to become involved and take an informed stand on the major aging issues we face as a society. Not simply a summary of research literature, Harry R. Moody and Jennifer R. Sasser's text focuses on controversies and questions, rather than on assimilating facts or arriving at a single correct view about aging and older people. Drawing on their extensive expertise, the authors first provide an overview of aging in three domains: aging over the life course, health care, and the socioeconomic aspects of aging. Each section is followed by a series of edited readings, offering different perspectives from experts and specialists on that subject. New readings focus on whether current federal spending on the elderly is sustainable and fair to other groups, how older consumers are reshaping the business landscape, and the challenges of marketing and selling to customers 60 and over. More emphasis is placed on how social class and inequality earlier in life can shape our final years and the number of older Americans living in poverty.

The section on Aging and Health Care has been thoroughly updated to reflect the latest data about chronic diseases that affect the elderly, government spending on health care, and policy changes to programs like Medicaid and Medicare. The section on the Social and Economic Outlook for an Aging Society gives the most current picture of the racial and ethnic diversity of older Americans, their participation in the labor force, and their income and wealth.

Handbook of Aging and the Social Sciences Linda George, 2010-11-26 Handbook of Aging and the Social Sciences, Seventh Edition, provides extensive reviews and critical evaluations of research on the social aspects of aging. It also makes available major references and identifies high-priority topics for future research. The book is organized into four parts. Part 1 reviews developments in the field of age and the life course (ALC) studies and presents guidelines on conducting cohort analysis. Part 2 covers the demographic aspects of aging; longevity trends; disability and aging; and stratification and inequality research. Part 3 includes chapters that examine socioeconomic position and racial/ethnic disparities in health at older ages; the role of social factors in the distribution, antecedents, and consequences of depression; and aspects of private wealth transfers and the changing nature of family gift-giving. Part 4 deals with pension reform in Europe; the political activities of older Americans; the future of retirement security; and gender differences in old age. The Handbook is intended for researchers, professional practitioners, and students in the field of aging. It can also serve as a basic reference tool for scholars, professionals, and others who are not presently engaged in research and practice directly focused on aging and the aged. - Contains all the main areas of social science gerontological research in one volume - Begins with a section on theory and methods - Edited by one of the fathers of gerontology (Binstock) and contributors represent top scholars in gerontology

Gender and the Life Course Alice Rossi, 2018-01-16 Gender and the Life Course is an interdisciplinary collection of essays on the lives of women and men as they are affected by history, culture, demography, economic and political stratification, and the biopsychological processes that attend maturation and aging. The book covers three major topics. Part I, which examines gender and the life course in broad historical perspective, includes a summary of recent work in biological ecology and primatology, and an analysis of the persistence of cultural and gender differences in role organization in societies undergoing the transition from agrarianism to industrialism. Other essays trace the changes in sources of household income of industrial workers over the life span, and review temporal and gender differences in life span transitions. Part II examines gender differentiation in a variety of contexts: psychological, psychobiological, and sociological. Alice Rossi's ASA Presidential Address reviews recent work on fathering and mothering, and argues that sociological explanations of such gender differences need supplementation by concepts from evolutionary theory and the neurosciences. Three essays deal with gender and economy: one shows how gender stratification took hold in the early stages of industrialization in France, another demonstrates the persistence of gender stratification in modern economies, the third focuses on ideology in relation to gender and political power. Part III examines various aspects of the aged in contemporary society, including an argument for an interpretive social science that uses diverse methods to improve our ability to describe and interpret many facets of the lives of elderly men and women; a review of the methodology used to study changes in the aged population over time; and an overview of existing data sets that permit further cohort and longitudinal analyses of the aged. The final essays review social policies as they affect the elderly, with particular attention to the fact that most very old people are women, and the impact of the greatly expanded life course for family and kin relations. Gender and the Life Course is a state-of-the-art assessment of the best work currently being done' on gender and age a's maturational factors and is essential reading for anyone interested in adult development and gender roles.

Aging and the Digital Life Course David Prendergast, Chiara Garattini, 2017-06 Across the life course, new forms of community, ways of keeping in contact, and practices for engaging in work, healthcare, retail, learning and leisure are

evolving rapidly. This book examines how developments in smart phones, the Internet, cloud computing, and online social networking are redefining experiences and expectations around growing older in the twenty-first century. Drawing on contributions from leading commentators and researchers across the world, this book explores key themes such as caregiving, the use of social media, robotics, chronic disease and dementia management, gaming, migration, and data inheritance, to name a few.

Growing Old in America Beth Hess, 2020-03-02 Modern industrial societies are characterized by long-term declines in fertility and steady increases in life expectancy. Together, these trends result in an aging population. The United States is no exception; since 1969 the median age has risen from 29.4 to a projected 36.4 in the year 2000. This fourth edition of the standard reader on the sociology of aging has been completely revised, with 90 percent new material, to reflect new information and new issues in this rapidly developing field. Students and practicing professionals will find it a lively, accessible overview.

Aging Bodies Christopher A. Faircloth, 2003-06-11 Western thought traditionally divides the human being into a body-mind dualism, a divide realized in the divergent research fields of geriatrics and gerontology; the first examines the physical body, and the second focuses instead upon psychological and social aspects of aging. Research Health Scientist Christopher Faircloth's edited volume of original pieces attempts to bridge this rift: reinserting the physical aging body and its lived experiences back into gerontology's study of aging. He asks, 'Is it not the physical body that readily marks us as aging?' Faircloth organizes this text around two major themes of the aging body: everyday experience, and the social and personal impact of its imagery, while concentrating on three areas of substantive concern: medicalization, gender/sexuality, and the body as consumer. This book would be of interest to gerontologists, social scientists, and students of these fields concerned with the aging body, both object and subject, as experienced and alternatively perceived in relation to contemporary society.

Gender, Social Inequalities, and Aging Toni M. Calasanti, Kathleen F. Slevin, 2001 The experience of men and women in later life varies enormously, not only along the lines of gender but also due to ethnicity, class, sexual orientation, and race. Calasanti and Slevin explore these differences, their genesis, their meaning to men and women, and their treatment in the policy arena.
