Psicopatología del desarrollo Lourdes Ezpeleta, Josep Toro Trallero, 2014-09-18 Los trastornos mentales (emocionales, conductuales y cognitivos) no se manifiestan igual en las distintas fases del desarrollo del ser humano: infancia, niñez, adolescencia, juventud, madurez o ancianidad. Diferentes edades propician la aparición preferente de diferentes trastornos. Los factores de riesgo y causalidad no son los mismos en cada etapa evolutiva. Las consecuencias negativas de padecer una patología mental también varían en función del momento de la evolución. La eficacia de un mismo procedimiento terapéutico depende en parte de la fase del desarrollo en que se halle la persona afectada. Hay patologías que se presentan más en un sexo que en otro, pero estas diferencias se hacen más o menos evidentes en función de la edad del paciente. Todo esto y muchas facetas más es lo que estudia la psicopatología del desarrollo, que no es sino una forma de contemplar la psicopatología de un modo dinámico, siguiéndola en el tiempo y considerándola longitudinalmente. Se trata de estudiar el desarrollo de los trastornos psicológicos que aparecen en unos seres en desarrollo. En esta obra se describen los trastornos más importantes de la psicopatología humana encuadrándolos en esta visión evolutiva. Cada capítulo ha sido desarrollado por psicólogos y psiquiatras de probada competencia clínica y/o investigadora, especializados en el trastorno en cuestión. Sin duda es un instrumento relevante en la formación y actualización de conocimientos de psicólogos, psicólogos clínicos, psiquiatras y otros profesionales (pediatras, médicos de familia, trabajadores sociales, enfermeros psiquiátricos, etc.) interesados u ocupados en la perturbación psicológica del ser humano.

Reading Fluency Asaid Khateb, Irit Bar-Kochva, 2016-05-11 The book is dedicated to the blessed memory of Prof. Zvia Breznitz, whose groundbreaking research has made a tremendous impact on the understanding of fluency in reading. The book presents a multidimensional perspective of recent research and reviews on fluency in reading. The first part presents recent brain-imaging findings from studies into the neurobiological basis of reading, as well as cognitive and language studies exploring the underlying factors of fluency in reading and its development. The second part comprises reviews of intervention studies that address reading ability, and in particular, fluency in reading. The book provides a unique multilingual perspective on reading research by including studies of readers of different orthographies and speakers of different languages. Both scientists exploring the different aspects of reading and language, and clinicians of reading intervention will find this book not only of great interest but extremely useful in its clear and in-depth presentation of current

reading research.

**El poder de la evaluación en el aula** Carla E. Förster,1905 Este libro aborda las principales temáticas evaluativas con las que un docente y una institución educacional se enfrentan en su quehacer cotidiano, y entrega herramientas prácticas para apoyar las acciones y decisiones en este ámbito. Tiene como propósito presentar los aspectos clave que un docente debe saber respecto de la evaluación en el aula para monitorear el aprendizaje de sus estudiantes. Se visibilizan los nudos críticos observados en la práctica evaluativa y se entregan orientaciones concretas y ejemplos de cómo realizar una evaluación de aula efectiva y realista para el contexto escolar. Los autores de este libro han querido relevar y presentar elementos evaluativos escasamente desarrollados desde el punto de vista educativo en la literatura de habla hispana, como son el alineamiento entre currículum, enseñanza y evaluación, la flexibilidad en las reglas de construcción de instrumentos de evaluación según su propósito, la retroalimentación efectiva, las rúbricas para evaluar desempeños y el uso de tablas de especificaciones para tomar decisiones pedagógicas (más allá de la construcción misma de los instrumentos). Así, el libro profundiza en el potencial que posee la evaluación en aula para mejorar los aprendizajes de los estudiantes y enriquecer la práctica evaluativa de los docentes.

Evaluación de la calidad educativa Elena Cano García,1998 El presente libro ofrece una amplia panorámica de los aspectos más relevantes en torno al tema de la calidad en la educación. En primer lugar analiza los motivos que pueden haber contribuido al aumento del interés por la calidad, para pasar después a explorar algunas de las definiciones de calidad en la educación más usuales, clasificándolas en función del elemento que consideran más influyente. La obra también aporta datos sobre los actuales estudios acerca de la calidad del sistema educativo, tanto a nivel nacional como internacional, procediendo a estudiar los documentos de la Administración educativa para descubrir en qué momento ésta parece empezar a preocuparse por el tema. El desarrollo de estas macro-evaluaciones enlaza con el tema de los indicadores educativos: su sentido, sus características y sus ventajas y limitaciones. Por otra parte, el libro también recoge información acerca de algunos instrumentos para la evaluación de la calidad de los centros educativos y liga este proceso evaluativo con la implantación de planes de mejora en las escuelas, proponiendo para ello la utilización de algunos procedimientos de la Calidad Total aplicados a la enseñanza.

**Fundamentos para la evaluación neuropsicológica** Nancy Hebben, William Milberg, 2010-12-14 Adquiera rápidamente el conocimiento y las habilidades que necesita para aplicar, calificar e interpretar con toda confianza los instrumentos de evaluación neuropsicológica más populares. Las pruebas neuropsicológicas pueden identificar cambios en la cognición, la conducta y las emociones; ayudan a determinar la causa de un trastorno o de un problema de desarrollo; son un apoyo indispensable para los clínicos en la planeación del tratamiento y la rehabilitación. Para utilizar apropiadamente estas pruebas, los profesionales requieren de una fuente autorizada de consejo y guía acerca de cómo aplicarlas, calificarlas e interpretarlas. Completamente puesto al día para incluir los instrumentos con mayor vigencia en la actualidad, incluyendo las escalas Wechsler de inteligencia, *Fundamentos para la evaluación neuropsicológica*, en su primera edición en español, presenta una revisión de los supuestos, la lógica, la base de conocimientos y las habilidades que subyacen la práctica de la evaluación neuropsicológica. Los expertos en neuropsicología Nancy Hebben y William Milberg describen la manera en que el historial clínico, las observaciones conductuales y los resultados de pruebas formales son empleados para realizar inferencias acerca de la contribución de la disfunción cerebral al funcionamiento psicológico. El libro está diseñado para ayudar a los profesionales de la salud mental a que adquieran rápidamente el conocimiento y las habilidades que requieren para un uso óptimo de los principales instrumentos de evaluación neuropsicológica. Cada capítulo presenta numerosos recuadros de referencia que subrayan los conceptos clave, los puntos más importantes, y un extenso material ilustrativo, así como preguntas de repaso para ayudarle a calibrar y reforzar su comprensión de la información abarcada. La obra ofrece una enseñanza exhaustiva sobre la redacción de reportes con temas prácticos y conceptuales relacionados con la evaluación neuropsicológica en escenarios especializados: geriátricos, pediátricos, forenses, entre otros.

*Evaluación económica de medicamentos y tecnologías sanitarias*: Javier Soto Álvarez, 2014-01-10 The ultimate purpose of this book on economic evaluation is to be a text for consultation and inspiration to anyone who wishes to design, carry out and analyse an economic evaluation of a drug or health technology, in order to obtain valid and quality results and thus serve to make better health-related decisions in our country. Unfortunately, the resources available in our National Health System to cover all the healthcare needs of our society are ever more limited; therefore, it is absolutely necessary to prioritise the allocation of resources and to use these resources to finance the therapeutic options that are most efficacious, safe and cost-effective (that will achieve the best health results in patients with the monetary investment carried out). Economic evaluations will be instruments of invaluable help for healthcare professionals and other decision-making agents of the system when it comes to making a more efficient use of existing resources, maximising the therapeutic benefit.

**Elaboración, gestión y evaluación de proyectos sociales** Tomás Fernández García, Laura Ponce de León

Romero,2016-01-14 Con el contenido de este libro los profesionales de las ciencias sociales (trabajadores sociales, psicólogos, educadores, sociólogos, animadores socioculturales...) podrán diseñar y llevar a cabo proyectos de intervención social individual, grupal y comunitaria dentro de la programación de las instituciones donde trabajen o colaboren. A su vez, se ofrecen las herramientas necesarias para favorecer el autoempleo, donde cualquier profesional puede llevar a cabo sus ideas, explicando las claves necesarias para la creación de entidades sociales desde las que planificar actividades, proyectos, programas y planes. También se explican las herramientas metodológicas para garantizar el éxito profesional de las acciones, centrándose en el apartado de la evaluación, uno de los más importantes para la sostenibilidad de los proyectos sociales. Los contenidos de este libro constituyen la base teórica imprescindible para la intervención social, que a su vez podrían ser implementados con la lectura de un segundo manual titulado Planificación y actuación estratégica de proyectos sociales, disponible también en esta misma editorial, donde el lector podrá encontrar contenidos más específicos para garantizar una programación estratégica desde las entidades sociales.

**International Handbook of Educational Evaluation** T. Kellaghan,D.L. Stufflebeam,2012-12-06 Thomas Kellaghan Educational Research Centre, St. Patrick's College, Dublin, Ireland Daniel L. Stufflebeam The Evaluation Center, Western Michigan University, MI, USA Lori A. Wingate The Evaluation Center, Western Michigan University, MI, USA Educational evaluation encompasses a wide array of activities, including student assessment, measurement, testing, program evaluation, school personnel evaluation, school accreditation, and curriculum evaluation. It occurs at all levels of education systems, from the individual student evaluations carried out by class room teachers, to evaluations of schools and districts, to district-wide program evaluations, to national assessments, to cross-national comparisons of student achievement. As in any area of scholarship and practice, the field is constantly evolving, as a result of advances in theory, methodology, and technology; increasing globalization; emerging needs and pressures; and cross-fertilization from other disciplines. The beginning of a new century would seem an appropriate time to provide a portrait of the current state of the theory and practice of educational evaluation across the globe. It is the purpose of this handbook to attempt to do this, to sketch the international landscape of educational evaluation - its conceptualizations, practice, methodology, and background, and the functions it serves. The book's 43 chapters, grouped in 10 sections, provide detailed accounts of major components of the educational

evaluation enterprise. Together, they provide a panoramic view of an evolving field.
