**Colin Mason**

**The Ultimate Alien Agenda** James L. Walden,1998 One night, teacher, counselor and public servant Jim Walden was awakened by a red-eyed alien creature at the foot of his bed. The encounter launched him on a search for answers. Here, Jim shares his experiences, discoveries, and astounding conclusion that aliens are our own ancestors living in an alternate dimension, working to preserve the planet.

*Night Siege* Joseph Allen Hynek,Philip J. Imbrogno,Bob Pratt,1998 In 1983, a few miles north of New York City, hundreds of people were startled to see a UFO - a series of flashing lights that formed a V as big as a football field, moving slowly and silently. This text explores all the evidence and over 7000 sightings, including those recorded up to 1995.

**Secret and Suppressed II** Adam Parfrey,Kenn Thomas,2008 The groundbreaking first edition of Secret and Suppressed influenced many in the conspiratorial 90s (including Chris Carter and his X-Files). Now comes the second edition, presenting a new set of revelations, rants, visions and nightmares that illuminate the paranoid and nightmarish post-9/11 world.

**HIDDEN IN PLAIN SIGHT** Richard Sauder, Ph.D.,2020-01-01 Dr. Richard Sauder's book Hidden in Plain Sight is an explosive, eye-opening sequel to his best-selling, Underground Bases and Tunnels: What is the Government Trying to Hide? In these pages, Dr. Sauder asks, and often answers, such questions as: Where are the secret underground bases? How far down do they go? What leaks are coming from the classified world? What has the U.S. Navy planned for beneath the ocean floor? Are there bases beneath the ocean? What's going on beneath Washington, D.C.? Are there high-speed, underground maglev systems? What is the connection with UFOs and the alien question? This is a book that truly goes where no other book has gone before. It is a must-read for any and all who are seeking to understand the full magnitude of the Matrix-like reality of our civilization. Using a combination of archival research, on-the-scene investigation, and firsthand interviews, Sauder takes the reader into a world that is under the ground and under the ocean. It is a world that we are supposed to think is impossible, and yet—after reviewing his evidence—seems all too likely.

*Grey Aliens and the Harvesting of Souls* Nigel Kerner,2010-01-19 Exposes the agenda behind the bio-robotic grey aliens' genetic manipulation of certain human races • Reveals the Grey's nature as sophisticated self-aware machines created by a long vanished extraterrestrial civilization • Explains how their quest to capture human souls appears in the historical record from biblical times • Explains how the phenomenon of racism is a by-product of their genetic tampering In 1997 Nigel Kerner first introduced the notion of aliens known as Greys coming to Earth, explaining that Greys are sophisticated biological robots created by an extraterrestrial civilization they have long since outlived. In this new book Kerner reveals that the Greys are seeking to master death by obtaining something humans possess that they do not: souls. Through the manipulation of human DNA, these aliens hope to create their own souls and, thereby, escape the entropic grip of the material universe in favor of the timeless realm of spirit. Kerner explains that genetic manipulation by the Greys has occurred since biblical times and has led to numerous negative qualities that plague humanity, such as violence, greed, and maliciousness. Racism, he contends, was developed by the aliens to prevent their genetic experiments from being compromised by breeding with others outside their influence. Examining historical records, Kerner shows that Jesus, who represented an uncorrupted genetic line, warned his disciples about the threat posed by these alien interlopers, while Hitler, a pure product of this alien intelligence, waged genocide in an attempt to rid Earth of all those untouched by this genetic tampering. Despite the powerful grip the Greys have on humanity, Kerner says that all hope is not lost. Greys exist wholly in the material world, so if we follow the spiritual laws of reincarnation and karma, aiming for enlightenment and rising above the material--a state the Greys are unable to reach--we can free ourselves from their grasp.

The 2030 Spike Colin Mason,2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and

prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

**The Vertical Plane** Ken Webster, 2022-02 The Vertical Plane: The Mystery of the Dodleston Messages: A unique supernatural detective story.

**Homo Deus** Yuval Noah Harari, 2017-02-21 Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

Bulletin of the Atomic Scientists, 1970-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world.

Abduction: Human Encounters with Aliens Mack, 2009-12-15 A Harvard psychiatrist, the author of *A Prince of Our Disorder*, presents accounts of alien abduction taken from the more than sixty cases he has investigated and examines the implications for our identity as a species. These mesmerizing and thought-provoking stories of alien encounters from a Harvard professor take you through actual case studies of people from all walks of life and ages who have had challenging, sometimes disturbing, and in every case, life changing experiences of alien abduction. "John Mack explores evidence of nonhuman intelligence like an attorney preparing for the 'trial of the century'—interviewing witnesses, examining physical

evidence, consulting with experts in related fields, constantly questioning his own assumptions...As a story of one man's determination to bear witness to cosmic mysteries with extraordinary implications for the human future, Abduction is bound to become a modern classic" (Keith Thompson, author of Angels and Aliens)

Saving Proxima Travis S. Taylor, Les Johnson, 2021 The year is 2072. At the lunar farside radio observatory, an old school radio broadcast is detected, similar to those broadcast on Earth in the 1940s and early 1950s, but in an unknown language, coming from an impossible source, and originating at an equally impossible location—Proxima Centauri. While the nations of Earth debate making First Contact, they learn that the Proximans are facing an extinction-level disaster, forcing a decision: Will Earth send a ship on a multiyear trip to provide aid? Interstellar travel is not easy, and by traveling at the speeds required to arrive before disaster strikes at Proxima, humans will learn firsthand the effects of Einstein's Special Relativity and be forced to ponder the ultimate of questions of Are we alone in the universe? and What does it mean to be human? At the publisher's request, this title is sold without DRM (Digital Rights Management). About Travis S. Taylor: "[E]xplodes with inventive action."—Publishers Weekly on Travis S. Taylor's *The Quantum Connection* "[Warp Speed] reads like Doc Smith writing Robert Ludlum . . . You won't want to put it down."—John Ringo

Chasing the Moon Robert Stone, Alan Andres, 2019-06-04 JFK issued the historic moon landing challenge. These are the stories of the visionaries who helped America complete his vision with the first lunar landing fifty years ago. A Companion Book to the AMERICAN EXPERIENCE® Film on PBS® Going in depth to explore their stories beyond the PBS series, writer/producer Robert Stone—called "one of our most important documentary filmmakers" by Entertainment Weekly—brings these important figures to brilliant life. In 1961, President John F. Kennedy proposed the nation spend twenty billion dollars to land a man on the Moon before the end of the decade. Based on eyewitness accounts and newly discovered archival material, *Chasing the Moon* reveals for the first time the unknown stories of the fascinating individuals whose imaginative work across several decades culminated in America's momentous achievement. More than a story of engineers and astronauts, the moon landing—now celebrating its fiftieth anniversary—grew out of the dreams of science fiction writers, filmmakers, military geniuses, and rule-breaking scientists. They include • Science fiction author Arthur C. Clarke, whose writing inspired some of the key players in the Moon race. A scientific paper he wrote in his twenties led to the U.S. beating Russia in one area of space: communications satellites. • Wernher von Braun, the former Nazi military genius who oversaw Hitler's rocket weapons program. After working on ballistic missiles for the U.S. Army, he was recruited by NASA to manage the creation of the Saturn V moon rocket. • Astronaut Frank Borman, commander of the first mission to circumnavigate the Moon, whose powerful testimony before Congress in 1967 decisively saved the U.S. lunar program from being cancelled. • Poppy Northcutt, a young mathematician who was the first woman to work in Mission Control. Her media exposure as a unique presence in this all-male world allowed her the freedom to stand up for equal rights for women and minorities. •

Edward Dwight, an African American astronaut candidate, recruited at the urging of the Kennedy White House to further the administration's civil rights agenda—but not everyone welcomed his inclusion. Setting these key players in the political, social, and cultural climate of the time, and including captivating photographs throughout, *Chasing the Moon* focuses on the science and the history, but most important, the extraordinary individuals behind what was undoubtedly the greatest human achievement of the twentieth century.

[If the Universe Is Teeming with Aliens ... WHERE IS EVERYBODY?](#) Stephen Webb,2002-10-04 In a 1950 conversation at Los Alamos, four world-class scientists generally agreed, given the size of the Universe, that advanced extraterrestrial civilizations must be present. But one of the four, Enrico Fermi, asked, If these civilizations do exist, where is everybody? Given the fact that there are perhaps 400 million stars in our Galaxy alone, and perhaps 400 million galaxies in the Universe, it stands to reason that somewhere out there, in the 14 billion-year-old cosmos, there is or once was a civilization at least as advanced as our own. Webb discusses in detail the 50 most cogent and intriguing solutions to Fermi's famous paradox.

[Converging Technologies for Improving Human Performance](#) Mihail C. Roco,William Sims Bainbridge,2013-04-17 M. C. Roco and W.S. Bainbridge In the early decades of the 21st century, concentrated efforts can unify science based on the unity of nature, thereby advancing the combination of nanotechnology, biotechnology, information technology, and new technologies based in cognitive science. With proper attention to ethical issues and societal needs, converging in human abilities, societal technologies could achieve a tremendous improvement outcomes, the nation's productivity, and the quality of life. This is a broad, cross cutting, emerging and timely opportunity of interest to individuals, society and humanity in the long term. The phrase convergent technologies refers to the synergistic combination of four major NBIC (nano-bio-info-cogno) provinces of science and technology, each of which is currently progressing at a rapid rate: (a) nanoscience and nanotechnology; (b) biotechnology and biomedicine, including genetic engineering; (c) information technology, including advanced computing and communications; (d) cognitive science, including cognitive neuroscience. Timely and Broad Opportunity. Convergence of diverse technologies is based on material unity at the nanoscale and on technology integration from that scale.
