Professional Financial Computing Using Excel and VBA Donny C. F. Lai,Humphrey K. K. Tung,Michael C. S. Wong,2011-12-28 Professional Financial Computing Using Excel and VBA is an admirable exposition that bridges the theoretical underpinnings of financial engineering and its application which usually appears as a black-box software application. The book opens the black-box and reveals the architecture of risk-modeling and financial engineering based on industry-standard stochastic models by utilizing Excel and VBA functionality to create a robust and practical modeling tool-kit. Financial engineering professionals who purchase this book will have a jumpstart advantage for their customized financial engineering and modeling needs. Dr. Cameron Wicentowich Vice President, Treasury Analytics Canadian Imperial Bank of Commerce (CIBC) Spreadsheet modeling for finance has become a standard course in the curriculum of many Quantitative Finance programs since the Excel-based Visual Basic programming is now widely used in constructing optimal portfolios, pricing structured products and managing risks. Professional Financial Computing Using Excel and VBA is written by a unique team of finance, physics and computer academics and practitioners. It is a good reference for those who are studying for a Masters degree in Financial Engineering and Risk Management. It can also be useful for financial engineers to jump-start a project on designing structured products, modeling interest term structure or credit risks. Dr. Jin Zhang Director of Master of Finance Program and Associate Professor The University of Hong Kong Excel has been one of the most powerful tools for financial planning and computing over the last few years. Most users utilize a fraction of its capabilities. One of the reasons is the limited availability of books that cover the advanced features of Excel for Finance. Professional Financial Computing Using Excel and VBA goes the extra mile and deals with the Excel tools many professionals call for. This book is a must for professionals or students dealing with financial engineering, financial risk management, computational finance or mathematical finance. I loved the way the authors covered the material using real life, hands-on examples. Dr.

**Accountant Interview Questions and Answers for Freshers - English** Navneet Singh, Preparing for an accounting interview as a fresher can be challenging, but with the right preparation, you can make a strong impression. Here are some common interview questions along with sample answers that might help you: 1. Tell me about yourself. Answer: I am a recent graduate with a degree in Accounting from XYZ University. During my studies, I gained a solid understanding of various accounting principles and practices. I completed an internship at ABC Company, where I assisted with preparing financial statements and reports, and learned to use accounting software like QuickBooks. I am highly motivated to start my career in accounting and contribute to your team. 2. Why did you choose accounting as your profession? Answer: I chose accounting because I have always enjoyed working with numbers and have a keen eye for detail. I appreciate the structured nature of accounting work and the importance of accurate financial reporting in making sound business decisions. Additionally, I believe accounting provides a solid foundation for understanding business operations and offers diverse career opportunities. 3. What accounting software are you familiar with? Answer: I have hands-on experience with QuickBooks, which I used during my internship to manage financial transactions and generate reports. Additionally, I am familiar with Excel and have used it extensively for data analysis and financial modeling. I am also open to learning new software and tools as needed. 4. Can you explain the difference between accounts payable and accounts receivable? Answer: Accounts payable represents the money a company owes to its suppliers or creditors for goods or services received, while accounts receivable represents the money owed to the company by its customers for goods or services delivered. Essentially, accounts payable is a liability, and accounts receivable is an asset. 5. How do you ensure accuracy in your work? Answer: I ensure accuracy by double-checking

my work, following established procedures, and maintaining a high level of organization. During my internship, I developed a habit of reviewing my entries and calculations to minimize errors. I also find it helpful to use checklists and set reminders for critical tasks to ensure nothing is overlooked.

6. Can you describe a challenging situation you faced during your internship and how you handled it? Answer: During my internship, I was tasked with reconciling a large volume of transactions that had discrepancies. I systematically went through each transaction, matched them with supporting documents, and identified the source of the discrepancies. By carefully analyzing the data and collaborating with my supervisor, I was able to resolve the issues and ensure accurate financial records. This experience taught me the importance of attention to detail and persistence in problem-solving.

7. What are the main financial statements, and why are they important? Answer: The main financial statements are the balance sheet, income statement, and cash flow statement. The balance sheet provides a snapshot of a company's financial position at a specific point in time, showing its assets, liabilities, and equity. The income statement shows the company's financial performance over a period, including revenue, expenses, and net profit. The cash flow statement outlines the inflows and outflows of cash, indicating the company's liquidity and ability to generate cash. These statements are important because they provide insights into a company's financial health and are used by stakeholders to make informed decisions.

8. How do you stay updated with the latest accounting regulations and standards? Answer: I stay updated by regularly reading industry publications, such as the Journal of Accountancy and the CPA Journal. I also follow updates from professional bodies like the AICPA and FASB. Additionally, I plan to pursue continuing education and certifications, such as the CPA, to ensure that I am aware of the latest developments in the field.

9. What are your strengths and weaknesses? Answer: My strengths include strong analytical skills, attention to detail, and proficiency with accounting software. I am also a quick learner and can adapt to new environments and tools efficiently. As for weaknesses, I sometimes find it challenging to delegate tasks because I want to ensure everything is done correctly. However, I am working on improving my delegation skills by trusting my team members and providing clear instructions and support.

10. Where do you see yourself in five years? Answer: In five years, I see myself as a certified public accountant (CPA) with advanced skills and experience in financial analysis and reporting. I aim to take on more responsibilities and possibly move into a managerial position where I can lead a team and contribute to strategic decision-making. I am committed to continuous learning and professional development to achieve these goals.
