*CSR and Management Accounting Challenges in a Time of Global Crises* Oncioiu, Ionica, 2021-06-25 Modern companies are subject to increasing pressures to conduct their business in an environmentally responsible manner due to social and environmental problems. Management of sustainable performance is one of the phenomena faced by the current business environment and, in particular, management corporations. The focus of management on profitability remains the main objective of any company, but it must also take into account the sustainability of social, economic, and environmental aspects. Under these circumstances, managerial decisions need to be adjusted and strongly substantiated, considering the information required by internal and external stakeholders, including financial reporting. The information requirements of customers and other stakeholders are steadily increasing, and some companies face certain problems in implementing the concept of sustainability and environmental reporting. *CSR and Management Accounting Challenges in a Time of Global*

Crises is a comprehensive reference source that explores various theoretical and practical approaches of management accounting and its impact in the 21st century and investigates new accounting and financial approaches where economic and social aspects become mutually supportive to enhance their impact on community development. Covering topics such as CSR reporting, sustainability, and greenwashing, this book is an essential resource for academicians, specialty organizations, chief financial officers (CFOs), financial controllers, business analysts, financial planning and analysis (FP&A) analysts, budgeting managers, students, researchers, and business environment managers and specialists.
