Communimetrics John S. Lyons, 2009-06-19 Measurement in human services means one thing: how well the effort serves clients. But the data doesn't exist in a vacuum and must be communicated clearly between provider and client, provider and management, and across systems. During the past decade, innovative communimetric measures have helped more than 50,000 professionals worldwide in health care, justice, and business settings deliver findings that enhance communication on all sides. Now, the theory and methods behind this fast-paced innovation are available in this informative volume. Communimetrics presents information in an accessible style, and its model of measurement as communication bolsters transparency and ease of interpretation without sacrificing validity or reliability. It conveys a deep appreciation for the unique position of service delivery systems at the intersection between science and management (and between quality and quantity), and shows readers how to create measures that can be used immediately to translate findings into practical action. This must-have volume offers readers the tools for understanding—and applying—this cutting-edge innovation by providing: The theoretical base for communimetrics. Practical illustrations comparing communimetrics with traditional methods. Guidelines for designing communimetric measures and evaluating their reliability and validity. Detailed examples of three widely used communimetric measures—the Child and Adolescent Needs and Strengths (CANS), the INTERMED, and the Entrepreneurial League System Assessment as well as detailed explanations for how they are used and why they work. Applications used in a range of settings, including children's services, adult mental health, services for the aging, and business and organizational development. Communimetrics provides a wealth of real-world uses to a wide professional audience, including program evaluators, quality management professionals, enterprise managers, teachers of field research

methods, and professionals involved in measurement and management design. It also makes an exceptionally useful text for program evaluation courses.

How to Prepare for the Examinations for Environmental Engineering Specialty Certification William C. Anderson, 1995

Redressing the Emperor John Lyons, 2004-07-30 Lyons provides a fresh and thought-provoking understanding of the children's public mental health system, as well as the need to foster its evolution and improvement. He presents the history of child mental health systems, including the U.S. system's roots and the early 19th-century case of the Wild Boy of Aveyron, which demonstrated the potentially therapeutic effects of environment. He shows us why modern leaders and presidents have issued calls for improvements to the U.S. child mental health system, and what barriers have slowed or even halted this evolution. Such barriers, Lyons explains, can be removed with community development and better clinical outcomes management. In addition to providing information for parents, family members, and advocates for improving the lives of children needing mental health care, this work will also interest clinicians, policy makers and students in social work, clinical psychiatry, public health and public policy.

Getting Ready for the 4th Grade Assessment Tests Erika Warecki, 2002 *Getting Ready for the 4th Grade Assessment Test: Help Improve Your Child's Math and English Skills* - Many parents are expressing a demand for books that will help their children succeed and excel on the fourth grade assessment tests in math and English -especially in areas where children have limited access to computers. This book will help students practice basic math concepts, i.e., number sense and applications as well as more difficult math, such as patterns, functions, and algebra. English skills will include practice in reading comprehension, writing, and vocabulary. Rubrics are included for self-evaluation.
