**History of CERN, III** J. Krige,1996-12-18 The present volume covers the story of the history of CERN from the mid 1960s to the late 1970s. The book is organized in three main parts. The first, containing contributions by historians of science, perceives the laboratory as being at the node of a complex of interconnected relationships between scientists and science managers on the staff, the users in the member states, and the governments which were called upon to finance the

organization. Parts II and III include chapters by practising scientists. The former surveys the theoretical and experimental physics results obtained at CERN in this period, while the latter describes the development of the laboratory's accelerator complex and Charpak detection techniques.

**The Prevention of Eating Problems and Eating Disorders** Michael P. Levine, Linda Smolak, 2006-04-21 This is the first authored volume to offer a detailed, integrated analysis of the field of eating problems and disorders with theory, research, and practical experience from community and developmental psychology, public health, psychiatry, and dietetics. The book highlights connections between the prevention of eating problems and disorders and theory and research in the areas of prevention and health promotion; theoretical models of risk development and prevention (e.g., developmental psychopathology, social cognitive theory, feminist theory, ecological approaches); and related research on the prevention of smoking and alcohol use. It is the most comprehensive book available on the study of prevention programs, especially for children and adolescents. The authors review the spectrum of eating problems and disorders, the related risk and protective factors, the models that have guided prevention efforts to date, the literature on the studies of prevention, and suggestions for curriculum and program development and evaluation. The book concludes with a new prevention program based on the Feminist Ecological Developmental model. The 800 + references highlight work done around the world. The Prevention of Eating Problems and Eating Disorders addresses: \* methodologies for assessing and establishing prevention; \* the implications of neuroscience for prevention; \* dramatic increases in the incidence of obesity; \* the role of boys, men, and the media on body image; \* prevention programming for minority groups; and \* whether to focus on primary or secondary prevention. Intended for clinicians and academicians from disciplines such as health, clinical, developmental, and community psychology; social work; medicine; and public health; this book is also an ideal text for advanced courses on eating disorders.

Ethics Dumping Doris Schroeder, Julie Cook, François Hirsch, Solveig Fenet, Vasantha Muthuswamy, 2017-12-04 This open access book provides original, up-to-date case studies of “ethics dumping” that were largely facilitated by loopholes in the ethics governance of low and middle-income countries. It is instructive even to experienced researchers since it provides a voice to vulnerable populations from the fore mentioned countries. Ensuring the ethical conduct of North-South collaborations in research is a process fraught with difficulties. The background conditions under which such collaborations take place include extreme differentials in available income and power, as well as a past history of colonialism, while differences in culture can add a new layer of complications. In this context, up-to-date case studies of unethical conduct are essential for research ethics training.

**European Security and Defence Policy** Esra Bulut,2009 This book analyzes the first ten years of ESDP, from 1999 to 2009. It provides a comprehensive and detailed outline of different aspects of ESDP, including the ESDP institutions responsible for civilian and military crisis management; the civil and military resources available for ESDP operations; and the relationship between ESDP and the United Nations, NATO, the OSCE, and the African Union. ESDP operations, to date, are analyzed, and their implementation, challenges, and achievements are reviewed. It includes data on member state contributions to ESDP operations.

**Dysconscious Racism, Afrocentric Praxis, and Education for Human Freedom: Through the Years I Keep on Toiling** Joyce E. King,2015-04-10 A dynamic leader and visionary teacher/scholar, Joyce E. King has made important contributions to the knowledge base on preparing teachers for diversity, culturally connected teaching and learning, and inclusive transformative leadership for change, often in creative partnership with communities. Dr. King is internationally recognized for her innovative interdisciplinary scholarship, teaching practice, and leadership. Her concept of dysconscious racism continues to influence research and practice in education and sociology in the U.S. and in other countries. This volume weaves together ten of her most influential writings and four invited reflections from prominent scholars on the major themes the work addresses. In the World Library of Educationalists, international scholars themselves compile career-long collections of what they judge to be their finest pieces—extracts from books, key articles, salient research findings, major theoretical and/or practical contributions—so the world can read them in a single manageable volume. Readers will be able to follow the themes and strands of their work and see their contribution to the development of a field.

Unconventional Protein Secretion Andrea Pompa,Francesca De Marchis,2016-09-24 This volume presents relevant background information to understanding the molecular basis governing unconventional protein secretion (UPS), and in particular explores the latest techniques and protocols that have been successfully applied for the study of this topic. Detailed chapters include an overview of conventional and unconventional secretory pathways along with multidisciplinary approaches and methods used for UPS analysis in different organisms. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, *Unconventional Protein Secretion: Methods and Protocols* will be useful for all interested in the secretory pathway field as well as applications in cell biology, cell development, biomedical research, and healthcare.
