**The Power of Playing Offense** Paul Epstein, 2021-03-02 Paul Epstein, founder of Purpose Labs, successfully steered business teams that executed billion-dollar NFL campaigns, broke Super Bowl revenue records, and generated league-leading sales results for cellar-dwelling NBA clubs. He then served as a consultant for the largest brands in business and sports. But after experiencing his own personal and career transformation, Epstein embarked on a mission to tackle a crisis of leadership. Now, in *The Power of Playing Offense*, Epstein invites you to meet him at the 50, and get real about taking a people-first approach that boosts performance, perseverance, and passion. In an effort to fill this gap in the market, Epstein curated this interactive playbook-and its corresponding website [www.powerplayingoffense.com](http://www.powerplayingoffense.com)-for influencers and leaders like you, with more than 50 activities, tools, and strategies you can implement on Monday morning. *The Power of Playing Offense* will help you level up your leadership and transform your team from paycheck driven to purpose-driven, from adversity to achievement, from disengaged to inspired, from controlled to connected, and from success to significance-resulting in a life and career of fulfillment and impact.

**Revolutionary Power** Shalanda Baker,2021-01-14 In September 2017, Hurricane Maria hit Puerto Rico, completely upending the energy grid of the small island. The nearly year-long power outage that followed vividly shows how the new climate reality intersects with race and access to energy. The island is home to brown and black US citizens who lack the political power of those living in the continental US. As the world continues to warm and storms like Maria become more commonplace, it is critical that we rethink our current energy system to enable reliable, locally produced, and locally controlled energy without replicating the current structures of power and control. In *Revolutionary Power*, Shalanda Baker arms those made most vulnerable by our current energy system with the tools they need to remake the system in the service of their humanity. She argues that people of color, poor people, and indigenous people must engage in the creation of the new energy system in order to upend the unequal power dynamics of the current system. *Revolutionary Power* is a playbook for the energy transformation complete with a step-by-step analysis of the key energy policy areas that are ripe for intervention. Baker tells the stories of those who have been left behind in our current system and those who are working to be architects of a more just system. She draws from her experience as an energy-justice advocate, a lawyer, and a queer woman of color to inspire activists working to build our new energy system. Climate change will force us to rethink the way we generate and distribute energy and regulate the system. But how much are we willing to change the system? This unique moment in history provides an unprecedented opening for a deeper transformation of the energy system, and thus, an opportunity to transform society. *Revolutionary Power* shows us how.

*Changing the Playbook* Howard P Chudacoff,2015-12-15 In *Changing the Playbook*, Howard P. Chudacoff delves into the background and what-ifs surrounding seven defining moments that redefined college sports. These changes involved fundamental issues--race and gender, profit and power--that reflected societal tensions and, in many cases, remain pertinent today: the failed 1950 effort to pass a Sanity Code regulating payments to football players; the thorny racial integration of university sports programs; the boom in television money; the 1984 Supreme Court decision that settled who could control skyrocketing media revenues; Title IX's transformation of women's athletics; the cheating, eligibility, and recruitment scandals that tarnished college sports in the 1980s and 1990s; the ongoing controversy over paying student athletes a share of the enormous moneys harvested by schools and athletic departments. A thought-provoking journey into the whos and whys of college sports history, *Changing the Playbook* reveals how the turning points of yesterday and today will impact tomorrow.

**Use the Power You Have** Pramila Jayapal,2020-07-14 Washington's progressive champion explains how we can achieve a truly inclusive America that works for all of us In November 2016, Pramila Jayapal (D-WA) was elected to the U.S. House of Representatives, the first Indian American woman to serve in that role. Two years later, the fast-rising Democratic star and determined critic of President Donald Trump, according to Politico's *Playbook 2017 Power List*, won reelection with more

votes than any other member of the House. Jayapal, co-chair of the Congressional Progressive Caucus, proved her progressive bonafides when she introduced the most comprehensive Medicare-for-all bill to Congress in February. Behind the story of Jayapal's rise to political prominence lie over two decades of devoted advocacy on behalf of immigrants and progressive causes—and years of learning how to turn activism into public policy that serves all Americans. Use the Power You Have is Jayapal's account of the path from sixteen-year-old Indian immigrant to grassroots activist, state senator, and now progressive powerhouse in Washington, DC. Written with passion and insight, Use the Power You Have offers a wealth of ideas and inspiration for a new generation of engaged citizens interested in fighting back and making change, whether in Washington or in their own communities.

And if those skills aren't already specialised enough, to fuel a cause in 2020 you also need to magically be an expert in online giving, digital advocacy and engagement.While there's no shortage of digital strategy advice, how much of it should non-profits pay attention to? Which ideas that sound intuitive could actually be hurting your long-term engagement? What is leading millions of potential donors and online activists to tune out over time? At Animals Australia, we put a lot of theories to the test and busted plenty of myths. This book outlines what worked for us in practice.And here's the truth. A decade of trial and error, research, and pushing boundaries has revealed one universal insight. The real key to building digital power has less to do with tech than it does people. **Electrify** Saul Griffith, 2021-10-12 An optimistic--but realistic and feasible--action plan for fighting climate change while creating new jobs and a healthier environment: electrify everything. Climate change is a planetary emergency. We have to do something now—but what? Saul Griffith has a plan. In *Electrify*, Griffith lays out a detailed blueprint—optimistic but feasible—for fighting climate change while creating millions of new jobs and a healthier environment. Griffith's plan can be summed up simply: electrify everything. He explains exactly what it would take to transform our infrastructure, update our grid, and adapt our households to make this possible. Billionaires may contemplate escaping our worn-out planet on a private rocket ship to Mars, but the rest of us, Griffith says, will stay and fight for the future. Griffith, an engineer and inventor, calls for grid neutrality, ensuring that households, businesses, and utilities operate as equals; we will have to rewrite regulations that were created for a fossil-fueled world, mobilize industry as we did in World War II, and offer low-interest "climate loans." Griffith's plan doesn't rely on big, not-yet-invented innovations, but on thousands of little inventions and cost reductions. We can still have our cars and our houses—but the cars will be electric and solar panels will cover our roofs. For a world trying to bounce back from a pandemic and economic crisis, there is no other project that would create as many jobs—up to twenty-five million, according to one economic analysis. Is this politically possible? We can change politics along with everything else.

**The Public Insult Playbook** Ruth Colker, 2021-10-26 When they go low, we learn: an examination of mudslinging in contemporary American politics—and how the left can find its footing to achieve structural reform in this mess. The rules of the public discourse game have changed, and *The Public Insult Playbook* argues that the political left needs to account for the power of vitriol in crafting their theories for social and political change. With this book, noted constitutional law expert and disability rights advocate Ruth Colker offers insights into how public insults have come to infect contemporary public discourse—a technique not invented by but certainly refined by Donald Trump—and, importantly, highlights lessons learned and tools for fighting back. Public insults act as a headwind and dead weight to structural reform. By showcasing the power of insults across a number of civil rights battlegrounds, *The Public Insult Playbook* uncovers the structural nature of personal attacks, and offers a blueprint for a legal and political strategy that anticipates the profound but poorly understood damage they can inflict to whole movements. Illustrating how completely the tactic has been adopted and embraced by the American right wing, the book catalogues how public insults have been used against people with disabilities, immigrants, people

seeking abortions, individuals who are sexually harassed, members of the LGBTQ community, and, of course, Black Americans. These examples demonstrate both the pervasiveness of the deployment of insults by the political right and the ways in which the left has been caught flat-footed by this tactic. She then uses the Black Lives Matter movement as a case study to consider how to effectively counter these insults and maintain an emphasis on structural reform.
